

.....

*Especially in inland
waterways where ships sail
close to inhabited areas,
sustainability is important.*

*But of course without
loss of power.*

.....

Ahead without headache

Whether you opt for a directly driven A-Pod DD or a version with a planetary gear A-pod PG or our new A-Pod CRP, we offer a 5-year warranty on all our products in combination with a maintenance contract.

Quality cannot be described in words but in deeds.

THE 'TESLA' FOR YOUR VESSEL

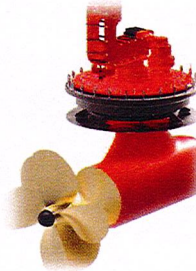

Revolutionary electric propulsion

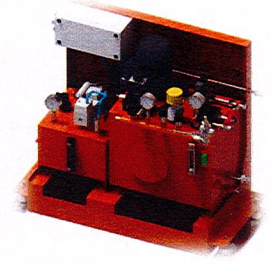

A-Pod PG

A-Pod DD

A-Pod CRP

A-Pod Oil Lub. System

The A-Pod results in lower fuel consumption (up to 30%) and exhaust emissions. Our rotating versions come in 360° endless or 2x110° degrees and eliminate the need for conventional propeller shaft and rudders.

In addition, all of our A-Pod systems have a minimum of rotating parts and work with forced oil lubrication, which instantly results in low maintenance costs.

Specifications

- High manoeuvrability
- Compact and efficient
- Easy installation
- Push or Pull configuration available
- Integrated (permanent magnet) e-motor
- Cooling electric motor by surrounding water
- Various propeller diameters possible
- Propeller can rotate both CW and CCW
- Quiet/ Low noise
- Low maintenance costs
- Power from 90 to 2500kW
